

Hi Tanner Families!

This fortnight we've continued to tune in to our inquiry unit "Our Place in Space" where we will be looking at the planets and how our position in space affects our weather.

We've had TWO more aliens visit us in Tanner Learning House! Each alien had brought with them more clues about our inquiry unit and set challenges for us to complete in order to save our planet!

We've also started discussing our big question "How does the Earth's position in space cause changes in our time and weather?" and how we can break it down into smaller questions that we can research and find answers to.

This inquiry unit is going to have limited access to technology. We will be visiting the Tuggeranong library later in term 3 to find other resources that we can use for our research.

Upcoming Events:

School photos - 9th August

Excursion to Tuggeranong Library - 15th August

Athletics Carnival - 17th August

SRC Cupcake Day - 18th August
