

Hi Families,

## Inquiry

In our 'Spinning in Space' inquiry we completed our design challenge to create a rocket. Some groups created rockets with the intention of successfully reaching the furthest distance and other groups attempted to make their rockets go the highest. The students worked collaboratively through the trial and error process to carefully create their rockets. We found out that being a scientist requires a lot of persistence and resilience.

## Buddies

This week year 5/6 students attended their buddy classes where they demonstrated responsibility and their leadership skills. The students worked alongside the preschool and kindergarten children to help develop their social skills and assist with social decision making.

## Upcoming Events:

- Week 4- School Photos
- Week 4- Morimoto Assembly
- Week 5- Athletics Carnival
- Week 6- Writing Showcase

Tanya Harley, Kathy Linehan, Mel Laver and Nicole Tuhan
